*Good Night...*

---

*We spend almost a third of our lives asleep.*

*This time we spend, the quality of sleep, affects all our lives, and studies show that 45% of people have sleep problems.*

*Listen to what the experts say to overcome these sleep problems. Do not forget that the way to a healthy life is a quality sleep!*

---

## GOLDEN RULES OF GOOD SLEEP

- 1- When buying a mattress, test its suitability for you. Make sure that the mattress you buy is at least 10-15 cm longer than your height and is suitable for your weight.
- 2- An ideal mattress should be able to read the ideal temperature in summer and winter. Ideal temperature bed; It is relaxing and calming.
- 3- Read something to relax you before going to bed.
- 4- Freshly washed pillows and sheets help you unwind.
- 5- You should stop eating anything at least 3 hours before going to bed, and avoid caffeine and nicotine consumption as much as possible.
- 6- Go to bed as early as possible. The body regenerates between 23:00 and 01:00. Don't miss your bedtime. Regular sleep time is the most effective solution to the problem of insomnia.
- 7- Make sure to fluff the pillow, ideal pillow; It is soft, not too high, supports your neck, is anti-allergic and washable.
- 8- Take care that the environment you sleep in is dark. The presence of light during sleep prevents the secretion of the hormone melatonin, which has many benefits such as cell renewal.
- 9- Get up early to sleep well and get enough rest.

## ULTRA STRONG SPRING SYSTEM

The spring system used in the mattresses is the result of the goal of perfection in heating and cooling degrees during the production phase in order to achieve the correct shape, durability, flexibility and performance, high performance and long-lasting products.

## HIGH DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. If two foams with the same hardness values feel similar, there is no doubt that the high density foam will be used for a much longer time without collapsing.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body curves so that the musculoskeletal system can maintain its healthy, orthopedic posture while lying down.

## COOLER FABRIC

Cooler technology ensures that the body stays cool by creating a feeling of coolness with its eco-friendly fabric. Cooler, which creates a cool sleep environment, shortens the time to fall asleep and provides a more comfortable sleep environment. In addition, the cooler fabric does not lose its coolness.

With Yourstock24 Fancy Mattress, you will leave your mornings behind when you wake up tired, thanks to the double support and high comfort it provides to the spine.

For A Deep Sleep, A Rested Body..

The result of the cooperation between Kustuyu and the world's best spring technology manufacturers. Feather Fancy Mattress, which has twice as many springs as its counterparts, provides 2 times more support to the spine. and with its high comfort, it allows you to leave behind the mornings when you wake up tired. While it provides extra comfort with its Ultra lumbar support exclusive to Kustuyu, it also becomes indispensable for a special, deep sleep thanks to our personalized system and technology.

## POCKET SPRINGS SYSTEM

According to the hardness of the mattress to be produced in the pocket springs system, the wires of different diameters are covered with fabric one by one and packaged independently from each other.

Different pressures are applied to many points of the body with wires of different diameters and zone springs of different hardness lined up for 5 different points of the body.

## SOFT FOAM

It is a soft orthopedic mattress of medium hardness, which is covered by a special foam produced with a mixture of Polyol and TDI raw materials on special spring systems, usually quilted with cotton fabric.

## BREATHING CAPSULES

It helps prevent sweating by increasing air circulation thanks to the air channels on the surface.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body curves so that the musculoskeletal system can maintain its healthy, orthopedic posture while lying down.

## WASHABLE PADS SYSTEM

Unlike other mattresses, the pad on the Como mattress is removable and dry-cleanable. This mattress not only provides a stress-free and healthy sleep, but also provides extra comfort of use.

The Como mattress provides excellent support by instantly detecting all points of the body that come into contact with the mattress, with the spring system formed by the pocket springs in its core and the spring technology consisting of the world's best pocket springs. Our non-stop working springs, the award-winning spring technologies of the como mattress with the smart spring, provide high air permeability.

## BONNEL SPRING SYSTEM

Bonnell spring mattresses are called mattresses made of spring and sponge, which are made without any connection with each other.

## FEATHER FOAM

Feather Foam has a very soft and flexible structure. By providing the first sensual contact of our body, it prevents your skin from being crushed under the weight of your body with its soft and silky structure. By balancing the pressure applied to the body, it minimizes the involuntary rotational movements during sleep.

## BREATHING CAPSULES

It helps prevent sweating by increasing air circulation thanks to the air channels on the surface.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body curves so that the musculoskeletal system can maintain its healthy, orthopedic posture while lying down.

## WASHABLE PADS SYSTEM

Unlike other mattresses, the pad on the Como mattress is removable and dry-cleanable. This mattress not only provides a stress-free and healthy sleep, but also provides extra comfort of use.

With FEATHER SPONGE TECHNOLOGY provides high comfort and high air permeability.

•One surface is soft and the other surface is hard. It provides the advantage of DUPLEX USE. It provides a unique comfort thanks to its Feather sponges, which are divided into 5 zones.

•In our Cosmopolitan bed; In order to provide superior comfort, different sponge combinations are used.

•Feather sponge has a honeycomb surface and is flexible and highly elastic. Thanks to this structure, it enables the body to be supported from every point, increases comfort by providing air permeability due to its structure, provides spring mattress comfort during the turns during sleep, and helps to create regional stiffness.

•Removable and washable knitted mattress fabric is used.

•There is a 30-day happiness guarantee.

## BREATHING CAPSULES

It helps prevent sweating by increasing air circulation thanks to the air channels on the surface.

Required for resting and renewing the human body, which is exposed to stress and fatigue throughout the day; It is nothing but a healthy sleep. Yourstock24, we have developed a fabric with anti-stress and anti-static effects in order to help remove stress and negative energy from the body, based on this fact. This fabric, which helps to renew the body and mind during sleep; It invites its users not only to sleep but also to therapy every night.

This fabric has a special function that helps to reduce the electricity accumulated in the body while helping the body to get rid of stress thanks to the special fabric on the upper part.

All of the springs are spirally connected to each other. Thus, they do not deform by moving at the same time and with the same resistance. Thanks to its lightness, it gives you the feeling of lying on the clouds. Thanks to the different form of the spring, the surface area expands and high efficiency springs are obtained. During a good night's sleep, the natural sleep movements that occur with the support and comfort provided by the springs to your body help the muscles to relax.

Lilit is presented to its users with its knitted mattress fabric, full quilted layers and high-density edge support foam. In addition, visual richness has been created with the color harmony of embroidery label, roving and edge layer. It will appeal especially to young consumers with its soft touch knit fabric and square textured embroidery design and modern line details on the upper fabric.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body curves so that the musculoskeletal system can maintain its healthy, orthopedic posture while lying down.

## BREATHING CAPSULES

It helps prevent sweating by increasing air circulation thanks to the air channels on the surface.

Thanks to the special spring system used in the Rapunzel mattress, it offers twice as many springs and more comfort than ordinary mattresses. With its brown fabric, it helps to balance body heat by absorbing it.

Special cut sponge is used in the thick pad layer in Rapunzel mattresses. In addition, thanks to the edge support sponges used on the edges of the bed, it is ensured that your mattress maintains its form for a long time.

The pull-edge model and special edge material provides air circulation in Rapunzel mattress, while it offers double spring comfort thanks to the 2 layers of springs inside.

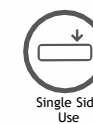

Thanks to the thermal conductivity of the soft-touch knit fabric with Brown technology, it provides you with an ideal sleep in all four seasons.

Yatağın Sertlik Derecesi

The spring system used in the mattresses is the result of the goal of perfection in heating and cooling degrees during the production phase in order to achieve the correct shape, durability, flexibility and performance, high performance and long-lasting products.

High-density foams are more elastic and more durable than low-density foams. If two foams with the same hardness values feel similar, there is no doubt that the high density foam will be used for a much longer time without collapsing.

A support system that fully adapts to your spine and body curves so that the musculoskeletal system can maintain its healthy, orthopedic posture while lying down.

It helps prevent sweating by increasing air circulation thanks to the air channels on the surface.

• An innovative mattress that has been specially developed with Feather technology to provide the most accurate support to the back and waist area, and that those who prefer a hard surface cannot remain indifferent.

• Orthopedic pandora, which has a harder and stronger mattress surface with its special spring system, provides the right support by grasping the body in the best way. Although the surface of the mattress is hard, there is no deterioration in its orthopedic structure. The zoned body suspension system, which gives the necessary support to the shoulders, hips and joints, helps to reduce fatigue.

• It provides extra comfort with its pad that increases comfort. With its air permeable structure in its fabric, it relaxes the heartbeat and balances the body temperature. With its feather-specific spring technology and other superior features, Orthopedic Pandora brings a new interpretation to the hard mattress preference and further enhances sleep quality.
